Summary — Experienced Software Engineer with expertise in frontend development, specializing in React.js with Next.js proven ability to design and deliver scalable web applications, with hands-on experience in building a chatbot using the Autogen framework (Python) and seamlessly integrating it with a React.js frontend.

Skills

Frontend: Next.js, React.js, Javascript, Tailwind CSS, Material UI

Backend: Python, FastAPI, Microsoft AutoGen
Languages: Python, Java, PL/SQL, SQL

Experience

Tech Mahindra

Aug 2023 – Present

Associate Software Engineer

ChatBot Development with Autogen Framework:

Role: Frontend Developer (with Backend Experience also)

Tech Stack:

Frontend: Next.js, React.js, Javascript, Tailwind CSS, Material UI

Backend: Python, FastAPI, Microsoft AutoGen

Key Responsibilities:

- Developed a chatbot leveraging the AutoGen framework for intelligent interactions.
- Focused primarily on frontend development, ensuring a seamless and responsive UI.
- Integrated Next.js and React.js for building dynamic and interactive user interfaces.
- Utilized JavaScript for type safety and maintainability.
- Styled components using Tailwind CSS for a modern and scalable design.
- Worked with FastAPI and Python to build efficient and scalable backend services.
- Implemented API interactions and data flow management between frontend and backend.

Re-BATT Energy Solutions Pvt Ltd.

Jun 2022 – Sep 2022

Intern

- Completed four full months of student internship training in Re-BATT Energy Solutions Pvt. Ltd. in Bangalore, and built a fully functional Li-ion Battery based Electric Buggy.

Education

Nagarjuna College of Engineering and Technology

BE- Electronics and communication

CGPA: 7.95; Year of Passing: 2023

Projects

Automatic Medical Wending Machines

- The Prototype constructed is to vend out medicines that does not need doctor prescription.
- By keeping COVID-19 pandemic in mind we designed a prototype which will performs three different operations all together 1. Medicine and Mask dispenser 2. Automatic hand sanitizer 3. Automatic refilling of sanitizer solution
- It will help rural India to get better medical facilities at much lower cost

Arc Reactor

- It's basically a fusion reactor, that harnesses energy by removing electrons from hydrogen atoms
- It's a fictional power source in the Marvel Cinematic Universe (MCU)
- Even though its net electricity produced is less it's better compared to other power sources

HEADGEARED-HEADPHONES

- The basic theme of this project is a headphone which transforms into a helmet and covers vital parts of a head immediately in any cases of accidents
- Helmet use can lead up to 42 percent reduction in the risk of fatal injuries
- The main motive of this project is to prevent a traffic accidental deaths
